Partnership

Quality

Always with taste!

The EDPOL Food & Innovation company has been specializing in the implementation and creation of innovative solutions for the food industry for over 25 years - including meat, fruit and vegetable, fish, bakery and the convenience food industries, as well as for wide group of entrepreneurs from HoReCa, who value quality.

We are constantly expanding the range with attractive products for food industry. In our portfolio, apart from seasoning mixes, breadcrumbs, sauces, there are innovative thermostable fillings, frozen sauces, broths and herbs as well as butter mixes. Our products are made of the highest quality ingredients. The assortment presented in the catalogue is only a fragment of a wider range of products created with passion by EDPOL Food & Innovation.

We focus on the principle: show us your product and you receive added value. Each article is appropriately personalized having on mind needs of our Partners. We compose unique and diverse flavours, and place the final product in chosen packages. In order to meet the needs of today's Consumers, we also offer portion packaging sauces and powdered products in sachets, bottle-sachets, cups and toppers. Fitting within the trend of convenience, portions allow you to create interesting, complementary kits, which increases the sale of your retail products. Due to the health & wellness trend, we can create sauces with the addition of bioactive components.

frozen products

Frozen products in Edpol Food & Innovation are articles whose natural ingredients have been preserved during the freezing process, which makes our products contain no artificial additives.

Taking care of the highest, repeatable quality and convenience of application, we have developed a range of frozen products in small portions eg: sauces, butter mixes, broths and thermostable fillings. We also produce unique recipes frozen and chilled butter mixes for baking industry.

A wide range of ready-to-use frozen sauces and broths pellets includes both the most popular and liked flavours as well as the unusual and sophisticated. Butter mix pellets can be used to prepare refined meats and fish, in order to give them uncommon taste. They are based on high quality 82% butter, olive oil or rapeseed oil with the addition of aromatic herbs. Whereas thermostable fillings are created based on vegetables, fruits, dairy raw materials and oil. Thanks to thermal stability during frying or baking, they give the dishes juiciness and unique taste.

Our range of frozen products offers the possibility to extend the purpose of using your standard product. Each Customer who values time, comfort and sophisticated taste will appreciate the comprehensive product you will be able to offer. Thanks to our support you will definitely stand out from the competition and lead over them.

sauces in portion packagings

We provide a wide range of sauces with different types of density. We use various ingredients to produce our sauces and these components make unique flavours (e.g. hot, mild, salty, sweet or sweet and sour). The basis for our sauces, depending on the expectations, can be vegetables, fruits or perfectly composed combinations. Mustard and mayonnaise provide the foundation for other sauces we have in portfolio. We specialize in the implementation of innovate taste combination in order to maximize using of natural ingredients. Density and particular flavour of our products are adapted to the needs of Customers. Every sauce share a common feature - a high quality, which is the result of work over the years.

In order to meet contemporary trends, we offer a single-portion product line - fix convenience. Portion packaging, both wet and dry product, includes the following forms: sachets, cups, bottle-sachets, cup tops and innovative bottle hangers. With our personalized solutions you will be able to increase sales, and therefore the profits, by giving the Consumer an attractive, wholesome set.
